Centrum Wiskunde & Informatica (CWI) has played a leading role in the implementation of DNSSEC at the Amsterdam Science Park. The project was a joint initiative from CWI, AMOLF and Nikhef. In 2013, these three NWO related research institutes submitted a proposal for the

Campus Challenge, a competition organized by SURFnet and SIDN. The implementation of DNSSEC was a part of it.

An interview on this case was published on the DNSSEC website on 2 April 2014: <http://www.dnssec.nl/cases/cwi-voortrekker-bij-implementatie-dnssec-op-science-park.html>
