ICTIR 2015 General Chairs' Welcome

Welcome to ICTIR 2015, the 5th International Conference on the Theory of Information Retrieval and the first conference with that name to be fully sponsored by the ACM Special Interest Group on Information Retrieval (SIGIR). Becoming part of the SIGIR family, along with the well-known SIGIR conference and the new CHIIR conference, will improve both the coordination between these venues and the availability of resources such as student scholarships. We believe that ICTIR is a natural complement to the SIGIR conference, with a stronger emphasis on theory and formal approaches, and less emphasis on large-scale experimentation and practice.

Given that ICTIR has generally been a smaller, more discussion-oriented conference than SIGIR, we felt that the Pioneer Valley, and Northampton in particular, would be an ideal venue for a September meeting. We hope to provide a relaxing small-town setting, beautiful Fall colors, and enough restaurants and bars to satisfy attendees used to living in large cities. The Center for Intelligent Information Retrieval and the University of Massachusetts are just on the other side of the Connecticut River in Amherst, and Noah Webster and Melvil Dewey did some of their best work at Amherst College, so there is a strong association with information retrieval. Given the quality of research that will be presented at ICTIR 2015, this should be another milestone in this local IR history. Enjoy the conference!

Program Chairs' Welcome

The program chairs are excited to welcome you to the ACM SIGIR International Conference on the Theory of Information Retrieval (ICTIR); a new episode in the history of ICTIR where the conference has been embraced by ACM SIGIR and now runs for the first time under their flag.

The conference aims to provide a forum for the presentation and discussion of research related to the *foundational* aspects of Information Retrieval (IR), including, for example, new or improved models of relevance, ranking, representation, information needs, and evaluation. Norbert Fuhr helped define foundation precisely as *a scientific result that others can build upon and use for their own research*. The class of scientific works solicited in the call for papers thus covers both purely theoretical contributions as well as reproducible experimental results; where reproducibility is emphasized (e.g., through sharing the data sets and/or software implementations).

The conference has been very successful in attracting high quality contributions, helping us compose a strong and varied program. In response to the call for contributions, the conference received a healthy number of submissions: 4 tutorials out of which we accepted 2 (or 50%), 43 short paper submissions where we accepted 22 (51%), and, 57 long paper submissions out of which 29 have been included in the final program (51%). (As an aside, due to the high quality of the submission pool, we would like to emphasize that acceptance rate is obviously not an indicator of quality!)

We thank all the program committee members for their effort and excellent reviews, the Tutorial Chair, Peter Bruza, and his committee for the selection of tutorials, and the General Chairs, James Allan and Bruce Croft, for their guidance. We invite you to enjoy the scientific program with exciting novel results in our field!

Arjen de Vries and ChengXiang Zhai

(Long paper PC Chairs)

Norbert Fuhr and Yi Zhang

(Short paper PC Chairs)

Table of Contents

ICTIR 2015 Organization	ix
--------------------------------------	-----------

ICTIR 2015 Sponsors & Supporters	xii
---	------------

Keynote & Tutorials

• Embedded Representations of Lexical and Knowledge-Base Semantics	1
Andrew McCallum (<i>University of Massachusetts, Amherst</i>)	
• Theory of Retrieval: The Retrievability of Information	3
Leif Azzopardi (<i>University of Glasgow</i>)	
• Statistical Significance Testing in Information Retrieval: Theory and Practice	7
Ben Carterette (<i>University of Delaware</i>)	

Session M1: IR Evaluation – Measures

• An Axiomatically Derived Measure for the Evaluation of Classification Algorithms	11
Fabrizio Sebastiani (<i>Qatar Computing Research Institute</i>)	
• Towards a Formal Framework for Utility-oriented Measurements of Retrieval Effectiveness	21
Marco Ferrante, Nicola Ferro, Maria Maistro (<i>University of Padua</i>)	
• Bayesian Inference for Information Retrieval Evaluation	31
Ben Carterette (<i>University of Delaware</i>)	

Session M2: Theoretical Framework and Transfer Learning

• Transferring Learning to Rank Models for Web Search	41
Craig Macdonald (<i>University of Glasgow</i>), B. Taner Dinçer (<i>Mugla University</i>), Iadh Ounis (<i>University of Glasgow</i>)	
• The Probability Ranking Principle is Not Optimal in Adversarial Retrieval Settings	51
Ran Ben Basat, Moshe Tennenholtz, Oren Kurland (<i>Technion</i>)	
• Dynamic Information Retrieval: Theoretical Framework and Application	61
Marc Sloan, Jun Wang (<i>University College London</i>)	
• A Theoretical Analysis of Two-Stage Recommendation for Cold-Start Collaborative Filtering	71
Xiaoxue Zhao, Jun Wang (<i>University College London</i>)	

Session T1: IR Evaluation – Interactive and Task Evaluation

• An Analysis of Theories of Search and Search Behavior	81
Leif Azzopardi (<i>University of Glasgow</i>), Guido Zuccon (<i>Queensland University of Technology (QUT)</i>)	
• Dynamic Test Collections for Retrieval Evaluation	91
Ben Carterette, Ashraf Bah, Mustafa Zengin (<i>University of Delaware</i>)	
• Development and Evaluation of Search Tasks for IIR Experiments using a Cognitive Complexity Framework	101
Diane Kelly, Jaime Arguello, Ashlee Edwards, Wan-ching Wu (<i>University of North Carolina at Chapel Hill</i>)	

Session T2: Query Representation

• Query Expansion with Freebase	111
Chenyan Xiong, Jamie Callan (<i>Carnegie Mellon University</i>)	

- **Language-independent Query Representation for IR Model Parameter Estimation on Unlabeled Collections** 121
Parantapa Goswami, Massih-Reza Amini, Eric Gaussier (*Université Grenoble Alps*)
- **Terms, Topics & Tasks: Enhanced User Modelling for Better Personalization** 131
Rishabh Mehrotra, Emine Yilmaz (*University College London*)

Session T3: Language Models for IR

- **Axiomatic Analysis of Smoothing Methods in Language Models for Pseudo-Relevance Feedback** 141
Hussein Hazimeh, ChengXiang Zhai (*University of Illinois at Urbana-Champaign*)
- **On Divergence Measures and Static Index Pruning** 151
Ruey-Cheng Chen (*RMIT University*), Chia-Jung Lee, W. Bruce Croft (*University of Massachusetts, Amherst*)
- **Partially Labeled Supervised Topic Models for Retrieving Similar Questions in CQA Forums** 161
Debasis Ganguly, Gareth J.F. Jones (*Dublin City University*)

Session T4: Entity Analysis

- **Entity Linking in Queries: Tasks and Evaluation** 171
Faegheh Hasibi (*Norwegian University of Science and Technology*), Krisztian Balog (*University of Stavanger*), Svein Erik Bratsberg (*Norwegian University of Science and Technology*)
- **Random Walks on the Reputation Graph** 181
Sabir Ribas (*Universidade Federal de Minas Gerais*),
Berthier Ribeiro-Neto (*Universidade Federal de Minas Gerais & Google Inc*),
Rodrygo L. T. Santos (*Universidade Federal de Minas Gerais*),
Edmundo de Souza e Silva (*Universidade Federal do Rio de Janeiro*),
Alberto Ueda (*Universidade Federal de Minas Gerais*),
Nivio Ziviani (*Universidade Federal de Minas Gerais & Zunnit Tech*)
- **Entropy and Graph Based Modelling of Document Coherence Using Discourse Entities: An Application to IR** 191
Casper Petersen, Christina Lioma, Jakob Grue Simonsen, Birger Larsen (*Aalborg University, Copenhagen*)

Session W1: IR Applications

- **Improving Patent Search by Search Result Diversification** 201
Youngho Kim, W. Bruce Croft (*University of Massachusetts*)
- **On Microblog Dimensionality and Informativeness: Exploiting Microblogs' Structure and Dimensions for Ad-Hoc Retrieval** 211
Jesus Alberto Rodriguez Perez, Joemon M. Jose (*University of Glasgow*)
- **Online News Tracking for Ad-Hoc Information Needs** 221
Jeroen B. P. Vuurens (*Delft University of Technology*), Arjen P. de Vries (*CWI*),
Roi Blanco, Peter Mika (*Yahoo Labs*)

Session W2: NLP and IR

- **IR meets NLP: On the Semantic Similarity between Subject-Verb-Object Phrases** 231
Dmitrijs Milajevs, Mehrnoosh Sadrzadeh, Thomas Roelleke (*Queen Mary University of London*)
- **A Theoretical Analysis of Cross-lingual Semantic Relatedness in Vector Space Models** 241
Lei Zhang (*Karlsruhe Institute of Technology (KIT)*), Thanh Tran (*San Jose State University*),
Achim Rettinger (*Karlsruhe Institute of Technology (KIT)*)
- **Context Retrieval for Web Tables** 251
Hong Wang, Anqi Liu, Jing Wang, Brian D. Ziebart, Clement T. Yu (*University of Illinois at Chicago*),
Warren Shen (*Cohesity*)

Session W3: Learning-based Retrieval Models

• Session Search by Direct Policy Learning	261
Jiyun Luo, Xuchu Dong, Hui Yang (<i>Georgetown University</i>)	
• Learning to Reinforce Search Effectiveness	271
Jiyun Luo, Xuchu Dong, Hui Yang (<i>Georgetown University</i>)	
• Learning Asymmetric Co-Relevance	281
Fiana Raiber, Oren Kurland (<i>Technion</i>), Filip Radlinski, Milad Shokouhi (<i>Microsoft</i>)	
• Implicit Preference Labels for Learning Highly Selective Personalized Rankers	291
Paul N. Bennett, Milad Shokouhi, Rich Caruana (<i>Microsoft</i>)	

Short Papers

• Anytime Ranking for Impact-Ordered Indexes	301
Jimmy Lin (<i>University of Waterloo</i>), Andrew Trotman (<i>eBay Inc.</i>)	
• Balancing Aspects in Retrieved Search Results	305
David Wemhoener, James Allan (<i>University of Massachusetts</i>)	
• Building a Self-Contained Search Engine in the Browser	309
Jimmy Lin (<i>University of Waterloo</i>)	
• Condensed List Relevance Models	313
Fernando Diaz (<i>Microsoft</i>)	
• Estimating the Uncertainty of Average F1 Scores	317
Dell Zhang (<i>Birkbeck, University of London</i>), Jun Wang, Xiaoxue Zhao (<i>University College London</i>)	
• The Feasibility of Brute Force Scans for Real-Time Tweet Search	321
Yulu Wang, Jimmy Lin (<i>University of Waterloo</i>)	
• Improving Pseudo Relevance Feedback in the Divergence from Randomness Model	325
Dipasree Pal, Mandar Mitra (<i>Indian Statistical Institute</i>), Samar Bhattacharya (<i>Jadavpur University</i>)	
• An Initial Analytical Exploration of Retrievability	329
Aldo Lipani (<i>National Institute of Informatics</i>), Mihai Lupu (<i>Vienna University of Technology</i>), Akiko Aizawa (<i>National Institute of Informatics</i>), Allan Hanbury (<i>Vienna University of Technology</i>)	
• On the Behavior of PRES Using Incomplete Judgment Sets	333
Ellen M. Voorhees (<i>National Institute of Standards and Technology</i>)	
• Optimal Packing in Simple-Family Codecs	337
Andrew Trotman (<i>eBay Inc.</i>), Michael Albert, Blake Burgess (<i>University of Otago</i>)	
• Pooling for User-Oriented Evaluation Measures	341
Gaurav Baruah, Adam Roegiest, Mark D. Smucker (<i>University of Waterloo</i>)	
• Predicting Relevance Feedback Effectiveness with the Help of the Principle of Polyrepresentation in MIR	345
David Zellhöfer (<i>Berlin State Library - Prussian Cultural Heritage</i>)	
• A Relationship between the Average Precision and the Area Under the ROC Curve	349
Wanhua Su (<i>MacEwan University</i>), Yan Yuan (<i>University of Alberta</i>), Mu Zhu (<i>University of Waterloo</i>)	
• Revisiting Optimal Rank Aggregation: A Dynamic Programming Approach	353
Shayan A. Tabrizi, Javid Dadashkarimi (<i>University of Tehran</i>), Mostafa Dehghani (<i>University of Amsterdam</i>), Hassan Nasr Esfahani (<i>Sharif University of Technology</i>), Azadeh Shakery (<i>University of Tehran</i>)	
• Searching for Twitter Posts by Location	357
Ariana Minot (<i>Harvard University</i>), Andrew Heier, Davis King, Olga Simek, Nicholas Stanisha (<i>MIT Lincoln Laboratory</i>)	
• A Signaling Game Approach to Databases Querying and Interaction	361
Arash Termehchy (<i>Oregon State University</i>), Behrouz Touri (<i>University of Colorado, Boulder</i>)	
• Study of Heuristic IR Constraints Under Function Discovery Framework	365
Parantapa Goswami, Massih-Reza Amini, Eric Gaussier (<i>Université Grenoble Alps</i>)	

• Theoretical Categorization of Query Performance Predictors	369
Victor Makarenkov, Bracha Shapira, Lior Rokach (<i>Ben-Gurion University of the Negev</i>)	
• Towards Less Biased Web Search	373
Xitong Liu, Hui Fang (<i>University of Delaware</i>), Deng Cai (<i>Zhejiang University</i>)	
• Two Operators to Define and Manipulate Themes of a Document Collection	377
Emanuele Di Buccio, Massimo Melucci (<i>University of Padua</i>)	
• Using Part-of-Speech N-grams for Sensitive-Text Classification	381
Graham McDonald, Craig Macdonald, Iadh Ounis (<i>University of Glasgow</i>)	
• Verboseness Fission for BM25 Document Length Normalization	385
Aldo Lipani (<i>National Institute of Informatics</i>), Mihai Lupu, Allan Hanbury (<i>Vienna University of Technology</i>), Akiko Aizawa (<i>National Institute of Informatics</i>)	
Author Index	389

2015 ACM SIGIR International Conference on the Theory of Information Retrieval (ICTIR) Organization

General Chairs: James Allan (*University of Massachusetts Amherst, USA*)
Bruce Croft (*University of Massachusetts Amherst, USA*)

Program Chairs: Arjen de Vries (*CWI Amsterdam & Delft University of Technology, The Netherlands*)
ChengXiang Zhai (*University of Illinois at Urbana-Champaign, USA*)

Program Chairs, Short Papers: Norbert Fuhr (*University Duisburg-Essen, Germany*)
Yi Zhang (*University of California, Santa Cruz, USA*)

Tutorial Chair: Peter Bruza (*Queensland University of Technology, Australia*)

Program Committee: Eugene Agichtein (*Yahoo Labs and Emory University, USA*)
