Foreword

We are pleased to welcome you to the 13th ACM International Workshop on Immersive Mixed and Virtual Environment systems (MMVE'21) held in conjunction with the ACM Multimedia Systems Conference (MMSys) 2021.

MMVE'21 received 7 high-quality submissions, covering a variety of multimedia topics, including virtual reality, distributed systems and quality of experience (QoE). Thanks to the hard and valuable work by the 20 program committee (PC) members, each submission received three or four reviews. As a result, five long and one short paper have been accepted, yielding an outstanding and very inspiring program. This year, the structure of the program will foster discussion and boost interaction between workshop attendees, by also encouraging authors to offer interactive showcases of their work.

We would like to take this opportunity to thank all the people who have contributed to the success of MMVE'21, including the authors, PC members, steering committee members and MMSys'21 organizers.

We hope that the workshop attendees will enjoy and learn from it.
