# CWI Library Book Sale

The library quite often receives book gifts. Books we do not have are added to our collection. Duplicates are collected through the years until we have enough books to organize a book sale. And now that time has come! We have over 150 books on sale for you in all categories of mathematics and computer science, for a price varying from € 2 to € 5.

At earlier sales you had to come to the library to browse the books, now the offer is online. Check the library home page to find the overview of the books on sale.

This is your chance to buy the classic you always wanted, the standard work which was just too expensive, or just find a book for fun.
